Completed Aluminum Powerful Fan

All-aluminum three-phase DC brushless drum high-power fan. Built-in three Hall elements, intelligently detect the rotor position and automatically realize electronic commutation, and make the inflatable effect more abundant.

SHOW DETAILS

Wheels with belts

Extra large rubber wheels, be powerful to pass through the film NON stuck film

Power Supplies and Heatsinks

1/100,000 accuracy
Imported temperature
sensing line, accurate
temperature production
Tolerance 0.5°C
Compatible with
110V-240V

The anti-falling design

Adopt the screw design that will not fall off even if it is loosened. When the screw is unscrewed, it is still attached to the machine to prevent the screw from being lost.

Control Panel

Simple design,
easy operation.
The temperature,
air and speed can
be adjusted from
1-100

Work for different air bubble material
