## Products Real Shot

# Product Details

## High Security Level

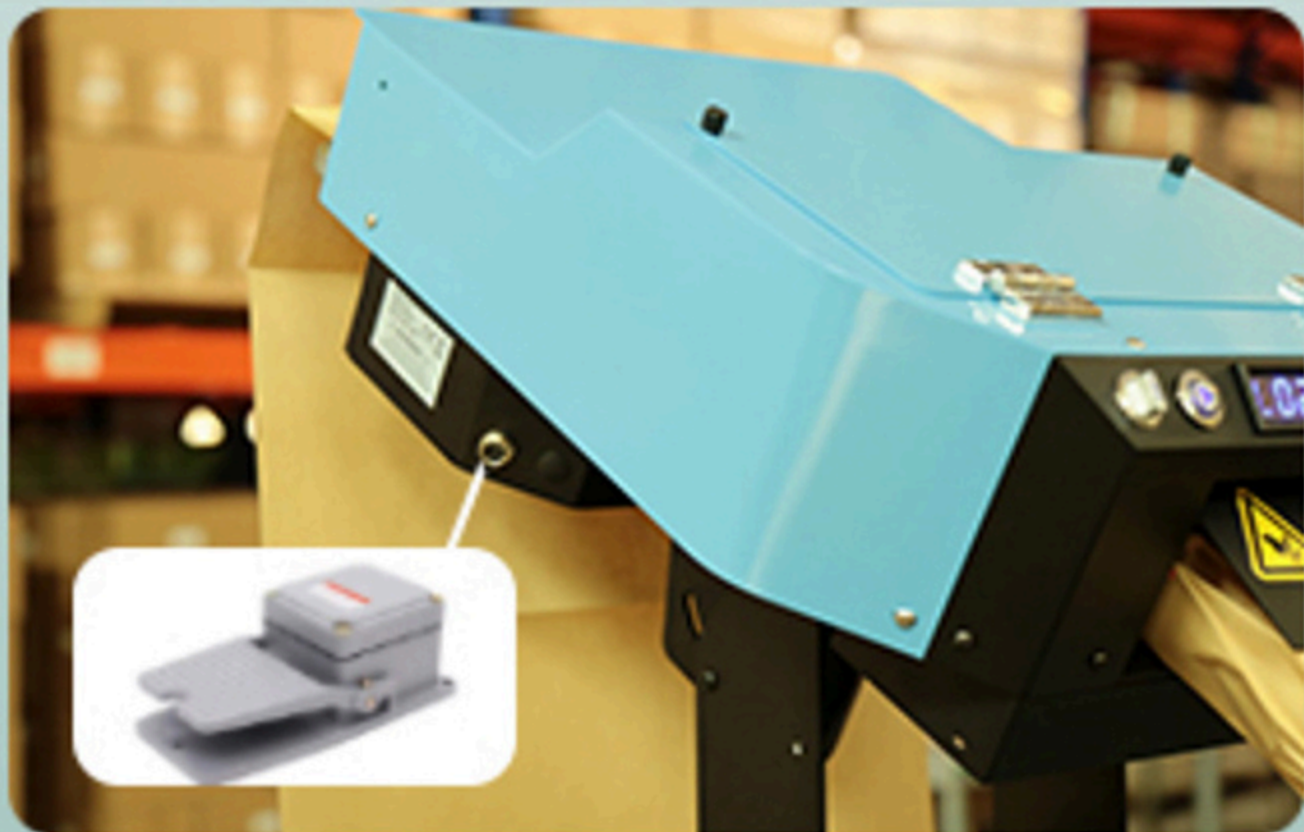

The cutter is built-in, which can be cut automatically, without the hidden danger of paper jams.

## Multi Working Mode

Automatic mode: set the length, start it and it will always output the paper.

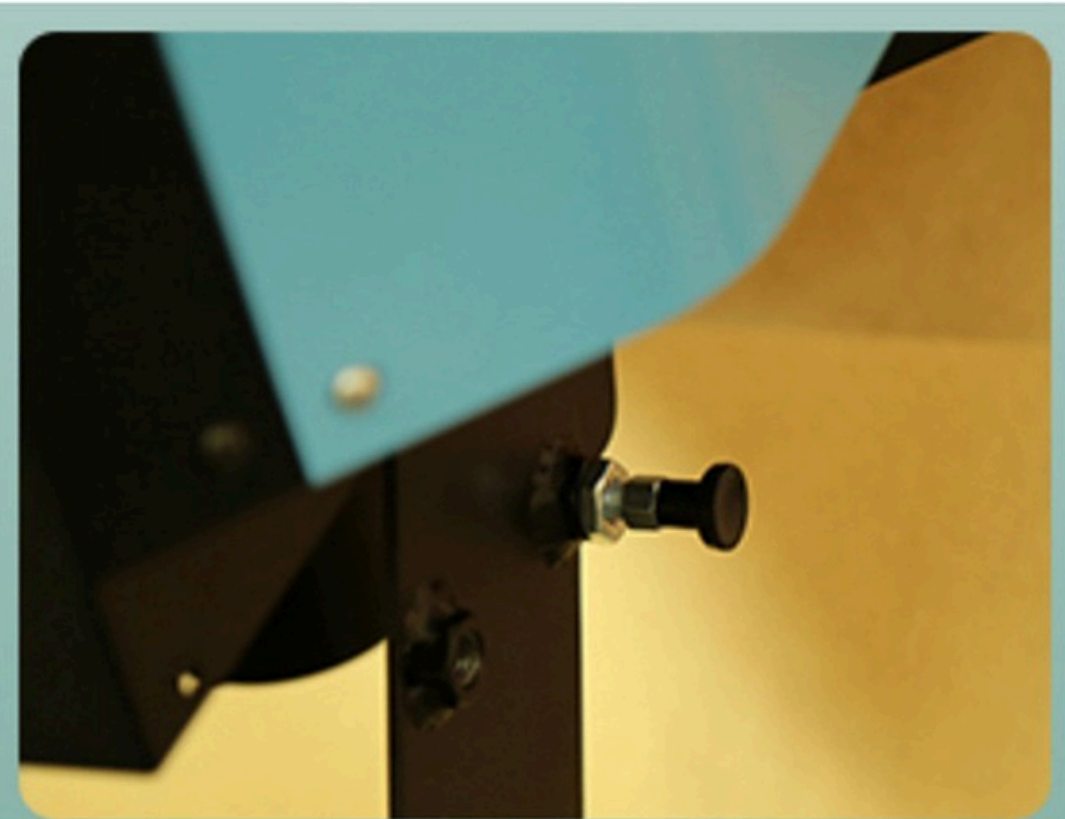

Single mode: set the length, you take one and it will take out one.

Pedal mode: press the pedal to output the paper, release the pedal and the machine stops running.

## Angle Adjustable

Provides 3-speed adjustable angle, freely adjust the height according to height and working environment, allowing you to work easily.

# Provides Perfect Protection

The kraft paper pad can fill the carton gap in all directions, providing efficient cushioning protection.

Traditional Foam Pad

- ❌ Traditional foam packaging is a non-environmental and non-recyclable material.
- ❌ The foam pad is thin and easy to break.
- ❌ The area filled by the foam pad is small and the cushioning effect is poor.
- ❌ The foam pad itself is not environmentally friendly and has odor. It takes more labor and time to fill the packaging, and the overall cost increases.

New Paper Cushion Pad

- ✅ The new kraft paper pad packaging is 100% environmentally friendly and recyclable materials.
- ✅ Kraft paper pad has high toughness and is not easy to break.
- ✅ The kraft paper bag can be three-dimensionally formed to fill a larger space and has a good cushioning effect.
- ✅ Kraft paper can perfectly match the paper pad machine, which can produce 30m paper pads per minute, which greatly improves the packaging efficiency and saves packaging costs.
