## INTRODUCTION TO TOUCH SCREEN INTERFACE

### LENGTH PARAMETER SPECIFICATION

L-Length of sheet

L-nuit: cm

L- Setting range:15-999

### QTY PARAMETER SPECIFICATION

0- no paper

1-99 quantity of paper

n-unlimited out of paper

### OPERATION SEQUENCE

L1-light → Length → Qty

### THE PAPER ORDER

L1\*Qty → L2\*Qty → L3\*Qty → L4\*Qty

### MODE DECLARATION

Single-Single paper mode

Remove the paper from the opening to continue the next

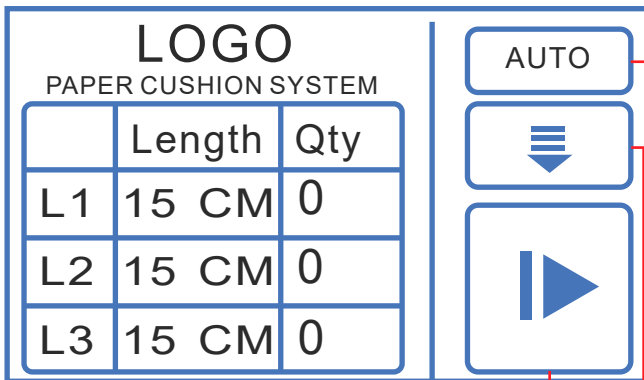

Auto-Automatic mode

According to the set quantity, continuous paper

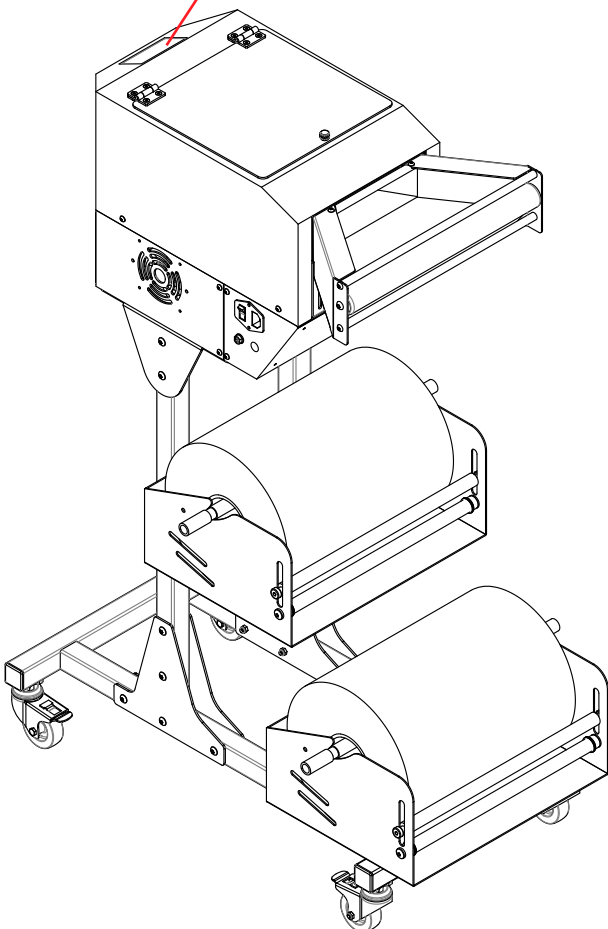

### MANUAL PAPER

Press and hold, paper continuously out, release the button, automatically cut off

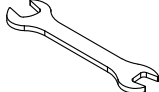

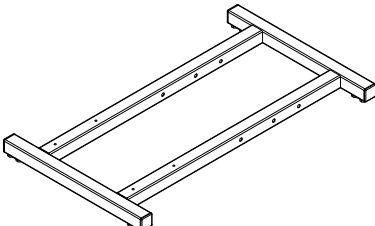

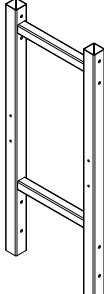

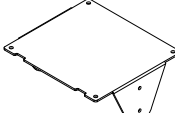

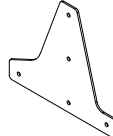

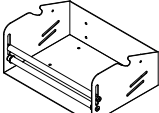

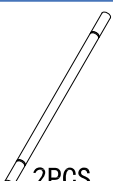

**NOTE** 1.Light touch no response, hold 2 seconds will be out of the paper  
2.Minimum paper length 15CM

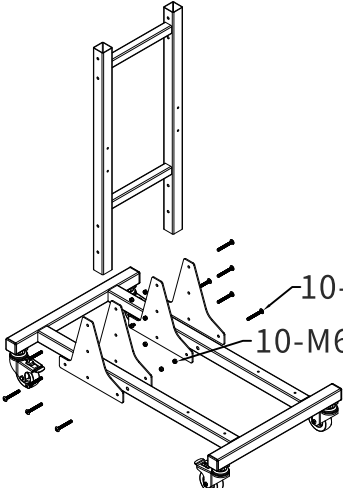

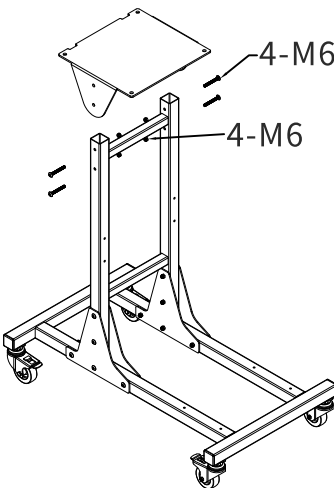

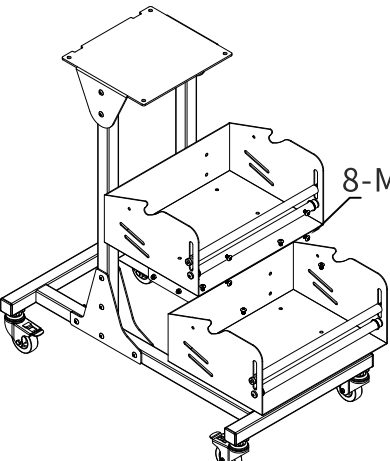

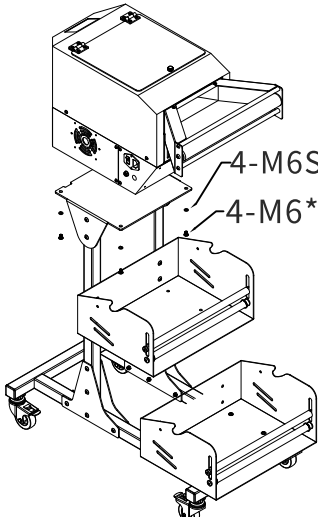

START, STOP

## INSTRUCTIONS FOR PAPER USE

Recommendations for paper:

1 single layer, 100% recycled paper-50g (no requirement for load bearing, the most cost-effective)

2 single ply, pure wood pulp paper - 50g

3 single ply, pure wood pulp paper - 70g

4 double layers, pure wood pulp paper-50g/50g

5 double layers, pure wood pulp paper-70g/100% recycled paper-50g  
(not recommended in principle)

Note: 1:The maximum paper width cannot exceed 395mm, and the maximum paper roll diameter is 24cm

2: Double layer 70g paper cannot be used, Will result in failure to run
