

Product Description

K330 is an Exhibition Grade Double Sided Cloth Tape with a calendared synthetic rubber adhesive and a white siliconised heavy duty release liner.

Product Features

- Specially developed for the Australian Exhibition Industry to
- be compatible with the floor tiles commonly used that have
- an additive to reduce their slip characteristics
- A differential coat weight of a special synthetic rubber adhesive with 70% better adhesion on the lined (carpet tile) side
- A very tough and tightly woven cloth backing. Although hard to hand-tear its structural strength ensures it lifts without breaking and the adhesive will remain well keyed to the cloth backing
- A heavy weight, siliconized white paper release liner not prone to tearing on removal
- Sold in 25 Metre length, the standard width for the exhibition trade tends to be 18mm but any width can be cut and a wider width generally recommended for edging applications to prevent trip hazards
- Highly credentialed Japanese manufacturer

Benefits

- ✓ Can be used on both concrete, stone and wooden surfaces (not recommended for carpets as too low a tack—try K5325 or others)
- ✓ Removes without breaking or leaving a residue (Note this applies to stable surfaces but testing always recommended prior to use as any surface treatment can effect performance)
- ✓ Easy to lay and strip liner—ideally used in its 25 Metre length so that do not need to hand-tear the role but scissors or a safe bladed knife may be required
- ✓ Designed to stay stuck to the exhibition surface when remove carpet tiles (this allows the tiles to be stacked without residual adhesive left on them and then finally the tape is lifted — even with forklifts driving over the carpeted surfaces it should lift without breaking)
- ✓ Approved for use (some locations exclusively) at major Exhibition Venues around Australia—contact us for details

Key Markets

- Exhibition & Display For the holding of all types of floor coverings, particularly where clean removal is an important criteria for us
- Film & TV A highly versatile double sided tape for the holding of props & scenery and temporary floor coverings
- Building & Construction For the holding of PE sheeting e.g. asbestos removal, render protection. For the holding of all types of floor coverings both temporary and permanent e.g. Anti-fatigue matting, retail carpeting and mats

DISCLAIMER:

Values: All values presented have been determined by standard test methods and are average values only.

Recommendations: Whilst we are happy to recommend products from our range for applications, it is imperative that the customer/user complete their own tests to determine suitability for their application under "working conditions" and if longevity is important, that ageing tests be carried out.

Warranty: We can only warranty our products to the level that they are consistent with our Product Information Sheet values

BUT CANNOT accept any responsibility or liability direct or consequential for loss or damage caused as a result of our recommendations.
