Welding Safety

NEW

Upgrade your performance

3M™ Speedglas™ Welding Helmet G5-03 Pro

3M Science. Applied to life.™

Farewell to compromises

The 3M™ Speedglas™ Welding Helmet G5-03 Pro Series is built for professional welders.

You need a welding helmet versatile enough that you don't have to compromise on function, performance OR safety.

The range includes both respiratory and non-respiratory welding helmets.

Featuring NEW Speedglas™ Technology...

Powered Air with
adjustable air
distribution

3M™ Speedglas™
True-View and
Variable Colour

Configurable extra
protection and
coverage options

New TAP
technology to grind
or cut

Advanced head
harness for improved
comfort and balance

Control your
lighting with an
optional task light

3M™ Speedglas™ Welding Helmet G5-03 Pro Air

Designed for the professional welder, the 3M™ Speedglas™ Welding Helmet G5-03 Pro Air connects to the 3M™ Adflo™ Powered Air Purifying Respirator (PAPR) for industry leading respiratory protection.

3M™ Speedglas™ Welding Helmet G5-03 Pro Air

Adjustable Air Distribution

Take complete control over the direction and movement of airflow within your welding helmet.

Direct the air flow over your face, head, or a combination of both. Customised air distribution helps prevent your eyes from drying out, leading to increased comfort.

Right side control

Direct the airflow to either your face, your visor, or a combination of both.

Left side control

Adjust the amount of air coming from the top outlet vs. the two side outlets, or choose a combination of both.

Heavy Duty Respiratory Protection

With a Required Minimum Protection Factor (RMPF) of 50, the Adflo PAPR provides at least 50 times cleaner air than the welder would be breathing unprotected.

Mobile and Adaptable Respiratory Protection

3M™ Adflo™ Powered Air Purifying Respirator (PAPR)

As one of the most popular respirators of its kind in the world, the Adflo™ Powered Air Purifying Respirator is designed to provide a constant nominal airflow rate of 170/200 litres per minute, regardless of the battery's charge or the particle loading of the filter.

With its slim profile, the Adflo respirator offers excellent lightweight, adaptable and easy-to-use respiratory protection.

See page 11 or 17 for ordering information.

A heavy duty backpack designed for welding applications is now available to provide improved comfort and balance.

Heavy Duty PAPR Backpack
Part No 954015HD

Industry leading protection

Since its launch, the 3M™ Adflo™ powered air respirator has become synonymous with welders' respiratory protection. The system is designed to meet the specific needs of welders.

Lightweight with Rapid Charge

The Adflo respirator is now over 15% lighter than the older style version with Ni-MH (black) battery. The lightweight battery charges up to 80% capacity in approximately an hour.

Filtered air to breathe

Constant, clean air flows directly into your breathing zone. Choose between 170 litres per minute or 200 litres per minute (for hot, humid jobs) with the push of a button.

Adaptable filtration

With the right type of filter, the Adflo powered air respirator effectively protects against a range of gases, vapours and particles.

You only have one set of lungs

The Adflo respirator complies with Australian and New Zealand Standard AS/NZS 1716 for powered air respirators and offers a Required Minimum Protection Factor (RMPF) of 50 for mechanically and thermally generated particles.

Heavy Duty Battery

An Adflo PAPR keeps you protected during long shifts. The Speedglas G5-03 Pro Air comes standard with the heavy duty Adflo battery, which can offer up to 12 hours continuous protection.

Effective Respiratory Protection for the Welder

Without effective protection, welders are exposed to a known carcinogen - welding fume.

However, by law, it is the employer's responsibility to reduce welding fume exposure to as low as reasonably practicable.

The results of a recent scientific study* have shown that a welding helmet with an integrated powered air purifying respirator can provide the welder with extremely effective respiratory protection.

Based on the results of the study, a Welding Helmet with integrated PAPR was the most effective method in protecting the welder from welding fume.

* Read more on the study here

Technical Data	Heavy-Duty 3M™ Adflo™ Powered Air Respirator
Approvals Respiratory Protection	Conforms to AS/NZS 1716
Required Minimum Protection Factor (RMPF) ¹⁾	50
Airflow Standard Airflow Plus	170 litres/minute 200 litres/minute
Battery Operating Hours	12 hours
Charging time	Li-ion with rapid charge (0-80% in an hour) ²⁾ 4-5 hours full charge.
Gas and odour filters are available as an optional extra. 1) For mechanically and thermally generated particles. 2) Heavy duty battery will be 80% charged (9.6 hours run time) in approximately one hour.	

3M™ Speedglas™ Welding Helmet G5-03 Pro

The 3M™ Speedglas™ Welding Helmet G5-03 Pro is a non-respiratory helmet designed for professional welders.

Each 3M™ Speedglas™ auto-darkening lens comes with a revolving 3 year warranty. This means that if you experience any issues with your welding lens within that time, your period of cover effectively resets.

What's more, you can extend this warranty period by 12 months for free by registering your product at www.apexweldingsafety.com.au

A more natural light state with Speedglas TrueView

With new 3M™ Speedglas™ TrueView Technology, colours appear even brighter and more realistic in both the light and dark states. A more realistic view can enable improved:

Accuracy

Improved recognition of colours and contrast allows better control of your weld puddle.

Productivity

Better focus on the welding setup, welding technique and inspection of just-completed welds.

Quality

An increase in the quality and precision of the welds.

Dark state 8 with setting A - natural tones

Dark state 8 with setting B - cool tones

Dark state 8 with setting C - warm tones

See your way...

To provide better vision and more control of your weld puddle, 3M™ Speedglas™ Variable Colour Technology allows you to choose between natural (A), cool (B), or warm (C) colour tones for your dark state.

You determine which colour tone provides the best viewing contrast for your welds, and the most comfort for your eyes.

Choose the welding lens best suited to your work and personal preference

The 3M™ Speedglas™ Welding Helmet G5-03 Pro Air and 3M™ Speedglas™ Welding Helmet G5-03 Pro are available to order as complete systems with either welding lens below.

G5-03 VC

Variable Colour Technology and Speedglas TrueView

Shades 3/5, 8-14 (14 for high amps)

New TAP function

Huge 73 × 109 mm viewing area with SideWindows

Four arc sensors detect down to 1 Amp

G5-03 TW

Speedglas TrueView with Extra Light State

Shades 2.5/5, 8-13 (2.5 Extra Light State)

New TAP function

Huge 73 × 109 mm viewing area with SideWindows

Four arc sensors detect down to 1 Amp

G5-03 NC

Speedglas TrueView

Shades 3/5, 8-12

Large 55 × 107 mm viewing area with SideWindows

Three arc sensors detect an arc down to 1 Amp

Does not feature TAP function

3M™ Speedglas™ G5-03 Pro System			
3M Speedglas G5-03 Pro Air with Adflo Powered Air	G5-03VC	G5-03TW	G5-03NC
	63 77 30	63 77 20	63 77 10
3M Speedglas G5-03 Pro	63 18 30	63 18 20	63 18 10

TAP on the side of the welding helmet, with or without a glove, to easily switch between grind (or cut) mode and weld mode.

No need to remove your helmet and compromise your protection.

Easy switching is just a TAP away

Switch quickly between modes (GRIND/CUT and WELD) by simply tapping the side of the helmet with your hand – even when wearing gloves.

The TAP function is robust and intuitive, and can be deactivated if needed.

Built into the G5-03TW and G5-03VC welding lenses*, the TAP function can help to improve productivity with button-less control.

1

Use the interface on the lens to set if you want to use TAP function with grind or cut mode.

2

TAP on the side of the welding helmet to switch between GRIND and WELD mode or CUT and WELD mode.

3

The welding lens will switch to the desired setting.

4

Tap again and the lens switches back to welding mode.

* Please note that TAP Technology is not available with the G5-03NC welding lens.

Enhance your grinding

The 2.5* light state in combination with an optional task light will allow you to grind with increased visibility. The TAP function allows for quick and easy switching between welding and GRIND mode.

Light state 2.5

TAP function

Task light

*2.5 state is only on the G5-03TW Auto-Darkening Lens (ADL)

Designed to provide powerful uniform lighting from a welding working distance.

Positioned to cast a wide light on the workpiece with configurable light intensity.

Let there be light...

Built specifically for welding, the optional helmet-mounted task light helps welders stay productive in poorly lit areas. It delivers a better view of the work area before and after welding, which can help to reduce fatigue.

3M™ Speedglas™ Task Light is designed to be low profile and lightweight.

For welders using the 3M™ Speedglas™ Welding Helmet G5-03 Pro Air, the task light is powered by the 3M™ Adflo™ Powered Air Purifying Respirator.

For welders using the Welding Helmet G5-03 Pro, a battery pack is available which connects to the rear of the welding helmet for a balanced fit.

Powered by the Adflo

Or

Rechargeable battery

Extend Your Protection

Do you require additional protection from heat, radiation, spatter and sparks?

There is a range of extended coverage options available to give you a more comfortable and protective environment.

① Head Cover

Increase coverage of your head by adding a fabric head cover.

② Neck Protection

The lower section of the welding helmet can be removed and replaced with customised neck protection suited to the welder's working position and application.

Spark Protection

Flame-retardant fabrics protect the welder from sparks and spatter.

Learn more about our range of extended head and neck protection on page 17.

To maximize coverage from sparks, add the fabric shroud and the extended, larger fabric head protection

Common parts between G5-01 and G5-03

For optimal flexibility onsite, many G5-01 spare parts are also compatible with G5-03. This allows you to hold less spare part inventory, while retaining the flexibility you need to customise your equipment.

All parts common with G5-01 are marked with a dot (•) after the part number.

Example: 16 90 30 • Shroud
