COLOURS

INTRODUCING GT7 ELECTRICAL INSULATION TAPE

Reliable Protection | High Performance | Versatile Applications

KEY MARKETS

Electrical wholesalers, electricians, and associated trades: Colour coding and insulation of electrical cables. It can also be used for wire and cable insulation and loom harnessing.

Building & Construction: Colour coding of pipe work.

Entertainment industry (AV): Cable harnessing, insulation, and abrasion protection

Auto and Marine: Prevent electrolysis and galvanic action between dissimilar metals

Agriculture: Drum and tube sealing, and packaging applications

Welding and Planting: Masking off during chemical and electroplating and stopping off in plating. It is also suited for the colour coding of components, intermediate stock and finished goods during manufacture.

BENEFITS

Environmentally Conscious: Lead-free and RoHS compliant

Safety: Flame retardant and self-extinguishing

Durable: Good UV and water resistance and has a non-corrosive adhesive. It also provides excellent UV resistance and good protection against abrasion, alkalis, and acids.

Versatile: Highly flexible and conformable, and comes in a wide range of colours. The available colours are black, translucent, blue, red, violet and white with more to be added soon.
