**NUEVOPAK**<sup>TM</sup>

# Nuevopak<sup>TM</sup> & Mission

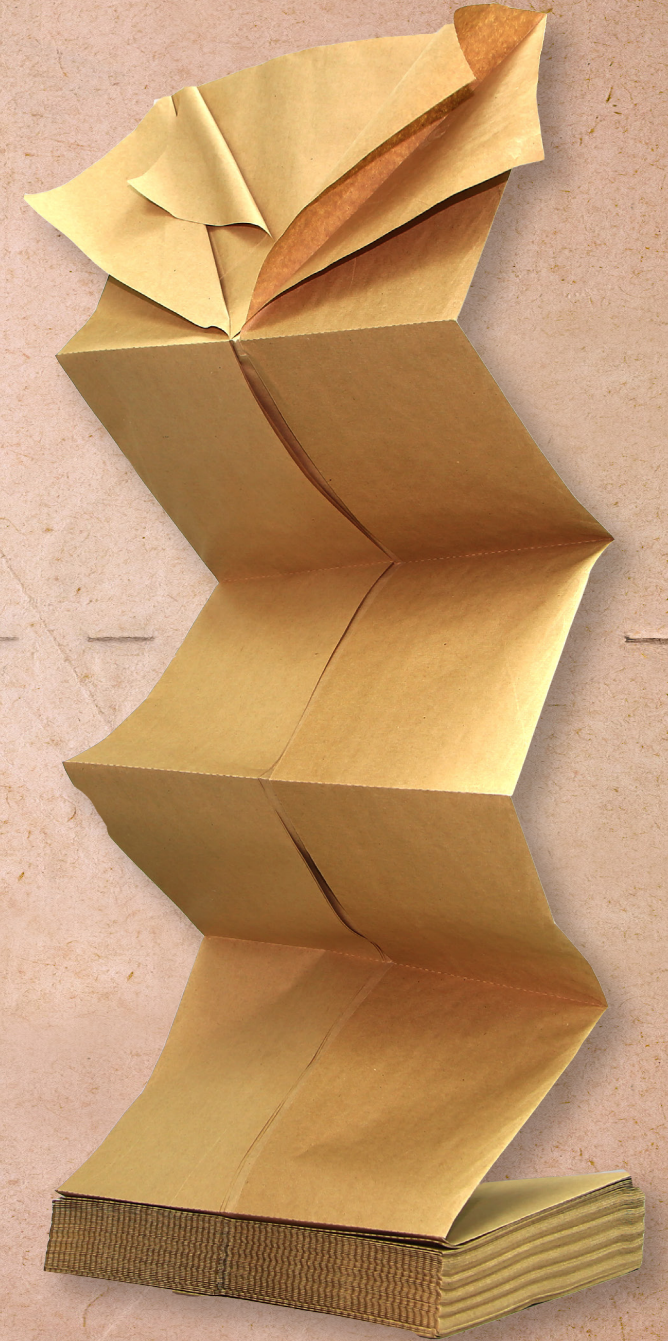

Nuevopak was founded in 2006 based on our passion for innovation. Since then, our mission has been to create and deliver paper packaging solutions that set new expectations in performance, flexibility, reliability, safety, affordability, and sustainability.

With our unique combination of bold innovation and seasoned industry experience, and the help of exceptional partners and customers, Nuevopak has quickly gained widespread recognition and acceptance in the global market. That spirit of innovation continues to drive us and we are confident that you will find we have stayed true to this spirit with our new revolutionary line of X-Series<sup>TM</sup> systems.

## X-Fold<sup>TM</sup>

We challenge assumptions to innovate. This includes THINKING OUTSIDE THE MACHINE<sup>TM</sup> to make a better “machine”. By creating our new X-Fold paper stock, we provided a new building block that enabled the design of our new sleek and compact X-Series paper packaging systems.

Our X-Fold paper provides a reduction in feed stock width without sacrificing output. Moreover, our X-Fold paper is specifically designed to quickly prime into our X-Series equipment and to be spliced effortlessly between units of X-Fold paper stock to provide continuous feed.

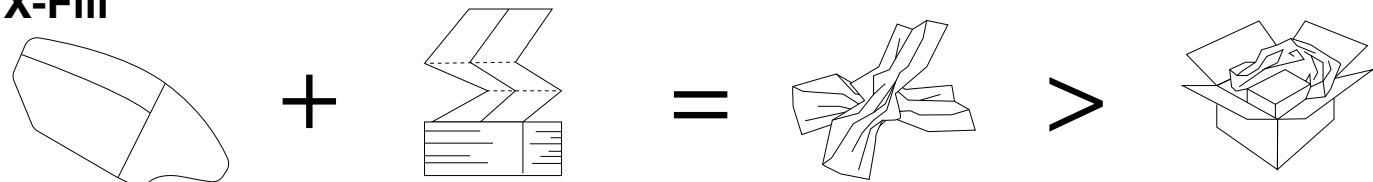

# X-Series™

The X-Series concept and design began to take shape in 2013 with the goal of setting the next standard for paper packaging systems. Now, based on the fundamental building block of our X-Fold paper, the X-Series systems challenge the current industry standard of oversized cumbersome paper packaging systems with a new standard of sleek, compact, and comfortable. This can translate to higher productivity, ease of use, space savings, better packing quality and cost savings equipment. The compact design of the X-Series systems also helps make new and exciting automation functions possible.

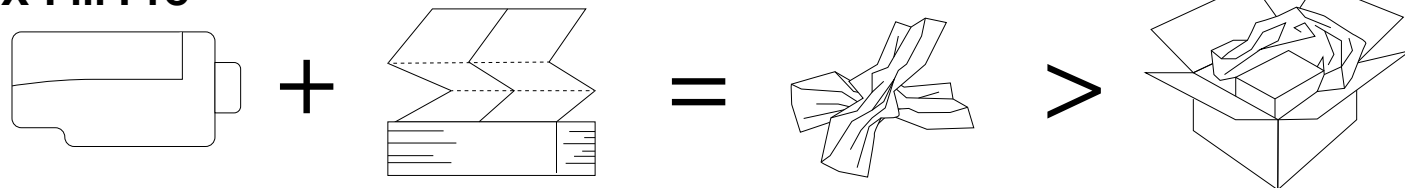

In addition, the X-Series systems include new modular designs which can dramatically streamline processes for parts repair and replacement.

Family members of the X-Series include the X-Pad+, X-Fill and X-Fill Pro systems. The X-Pad+ packaging system is especially suitable for cushioning and “block and brace.” The X-Fill system and its brother, the X-Fill Pro systems, are exceptionally suited for void filling operations.

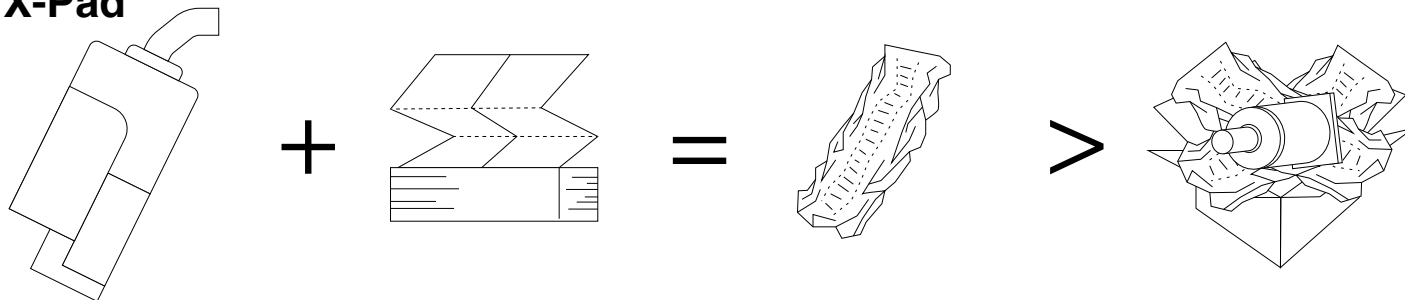

## X-Fill

## X-Fill Pro

## X-Pad

# X-Fill™

Good for small to medium volume void fill packaging operations. Two simple and user friendly modes of control. Angle of equipment easily adjustable. Paper speed sets at approximately 1.7m/s for incredible throughput.

Design ready for easy system integration and future automation upgrades. Suitable for various paper basis weight, single ply, and X-Fold or conventional fanfold paper. Options include single or multiple-stack paper trays.

# X-Fill Pro™

Good for medium to high volume void fill packaging operations. Four simple, user friendly, and efficient modes of control for different packaging operational needs. Angle of equipment easily adjustable. High throughput paper speed sets at between 1.2 – 2.0 m/s for different preferences and needs of packers.

Design is suited for easy system integration and future automation upgrade. Suitable for various paper basis weight, single ply, and X-Fold or conventional fanfold paper. Options include single or multiple-stack paper trays.

# X-Pad+™

Equipment size, weight, and footprint are less than that of popular competitor systems (about half the size or even smaller in comparison), while pad size generated is standard industrial size, with no trade off in packaging protection and performance.

Four modes of control with large touch screen for easy operation. Angle of equipment easily adjustable. Speed adjustable between 0.2 – 0.9 m/s for different preferences and needs of packers. Table side stand is an innovative design configured for higher productivity. Suitable for various paper basis weight, single ply and double plies, X-Fold paper, and single and multiple-stack paper trays. Ready-Load™ paper stock design makes loading easier than ever before. Design is ready for easy system integration and future automation upgrades.

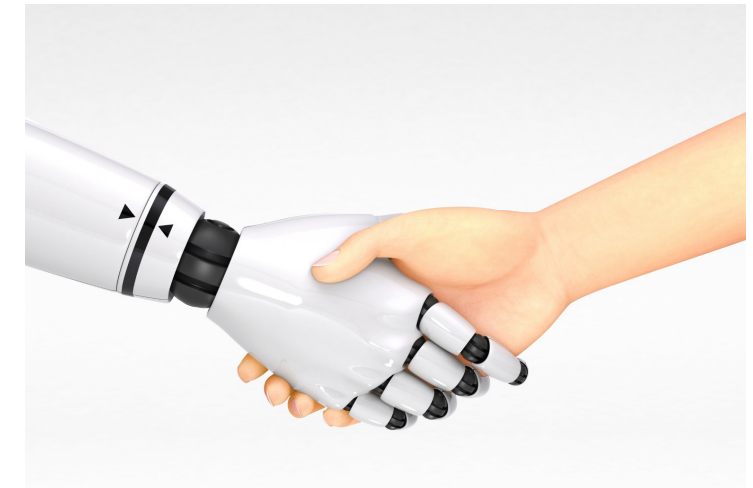

# Ready-Load™

Our X-Fold paper stocks come with a Ready-Load feature which enhances the X-Fold quick prime design for our X-Series equipment.

# Commitment

We use recycled paper as our main packaging material, including for our X-Fold paper building block solution, to stay true to one of our main missions: *environmental sustainability and protection of our planet.*

We strive to meet and exceed our customers' needs and to provide a safe and fulfilling work environment for our employees. We always adhere to the highest standards of integrity in conducting our business and interacting with the community. It is our sincere belief that these traits are essential by the way we measure success.
